

CNC traffic light

A CNC traffic light for a hobby milling machine is surely only a luxury, but it simply makes fun, and that is already the most important reason to build something like this.

Suitable warning lights are available at Aliexpress under the name: "warning light industries CNC machine" and similar search terms. Depending on the version it costs (as of 2022) between 10 and 20, - €.

Functions of the warning light extensions shown here

- connection via WLAN
- only connection cable the is 12-24V supply
- switching of the green, yellow, red LED via LinuxCNC
